

Power

European leader in advanced technology solutions

About Acal BFi

Acal BFi are Europe's leading provider of advanced technology solutions, operating in 12 countries throughout Europe.

We offer products across specialist technology areas, each with a dedicated pan-European sales team. Customers use our design-led expertise and expert consultation services to find the best technology solutions for their design, prototype and production needs.

A wide choice and expert support

With a broad product portfolio which includes some of the industry's most respected and innovative power-supply manufacturers, our standard range starts at 1W DC/DC converters, includes external, medical and goes up to 100kW AC/DC for customised power-supply units.

The flexibility of our portfolio and network of expert partners, combined with in-house design and customisation, means we can help you find, customise or design a reliable and efficient power supply for your application.

consult. design. integrate.

Standard or customised power supplies

Acal BFi's power team can help you balance the technical and commercial decisions for supplying power for competitively priced commercial, industrial and medical applications, or for products which operate in the most extreme or mission-critical environments.

We help you to take time out of your design-to-production process by using specialist knowledge to consider the total cost of ownership and lead times, as well as your design's electrical, mechanical and physical criteria.

Standard products

Our experts can advise on the best off-the-shelf solutions from our extensive range of quality suppliers.

Modified standard products

We can take standard products from a number of our suppliers and configure them specifically for your needs, thereby optimising functionality and performance for your application.

Custom design products

Where standard or modified standard products will not suffice, we have the skills, experience and suppliers to design, build and supply completely bespoke power solutions. We also have wholly owned Acal BFi Group companies who specialise in power supply and magnetic solutions:

Myrra are a globally recognised provider of custom magnetic components, specialising in the production of high-quality, high-reliability transformers, inductors, chokes and coils.

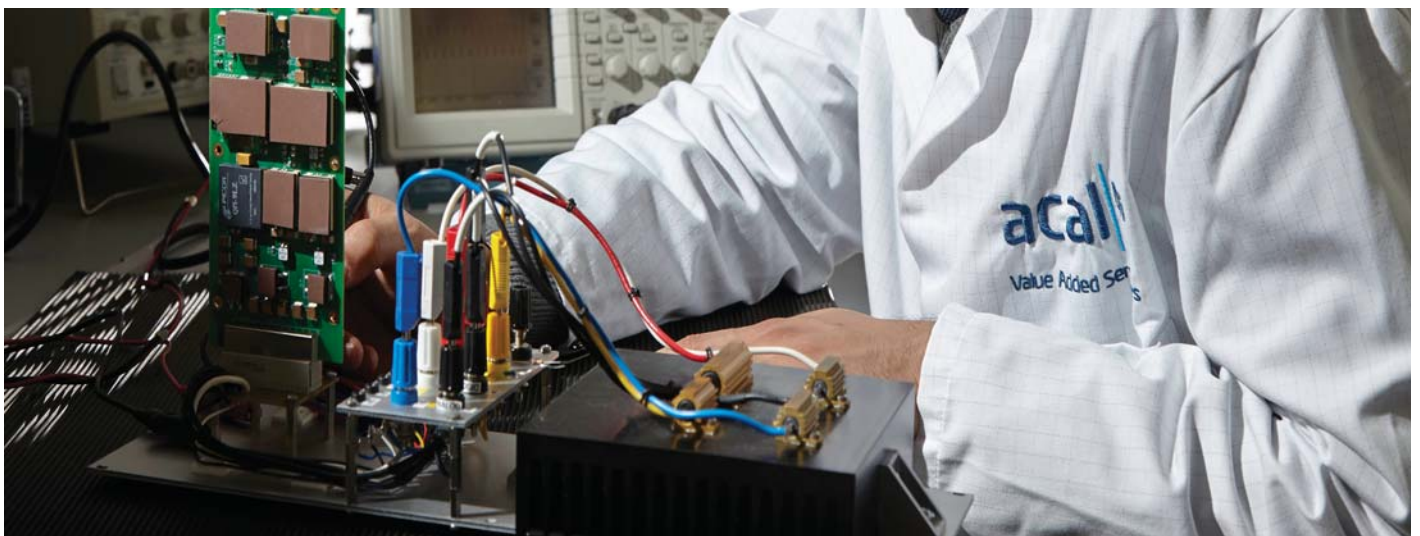

Noratel are one of Europe's leading suppliers of transformer products and know-how. They are renowned for their high-quality wound components.

RSG Electronic Components GmbH have more than 25 years' experience in developing customised power supplies for a wide range of demanding applications.

In-house customisation can help you reduce manufacturing time and costs, by integrating special interfaces and enclosures, whilst our in-house EMC pre-compliance testing helps to fast-track your power supply towards local or global EMC approval.

Key partners overview

Acal BFi work with the leading manufacturers in their field offering you a complete solution for your power needs.

 **Acal BFi** provide a range of custom and bespoke power solutions to a range of customers and industries.

 **Bothhand Enterprise** produce DC/DC converters and LAN power supplies for a broad range of blue-chip customers.

 **Cincon** are a global supplier of switch-mode, power-conversion products to the medical, communications, industrial and consumer markets.

 **EOS** supply ultra-miniature, high-efficiency power solutions. They design and manufacture small, efficient, AC/DC switching power supplies ranging in power output from 25 to 350 watts.

 **ETA Power** manufacture power conversion devices, including standard and custom AC/DC power supplies and DC/DC converters, ranging from 1.5 to 1000 Watts.

 **Excelsys** design and manufacture high-power density, high-efficiency power supplies for a variety of specialist markets.

 **FSP (Protek)** are dedicated to the design and manufacture of switching power supplies for a myriad of applications including medical, telecommunications, POS and control systems.

 **Glacial Power's** power division manufacture switch mode power supply solutions for LED lighting applications.

 **Harvard Engineering** design, develop and manufacture electronic HID ballasts, LED drivers and control products for the lighting industry.

 **Haze** manufacture batteries for mission-critical telecom and standby power applications, and offer a wide range of battery products.

 **HiTron** are a switching power supply manufacturer of, AC/DC, DC/DC, Compact PCI, rack, module and DIN rail units for a wide range of markets.

 **ICCNexergy** are the industry leader in custom rechargeable power systems including lithium-ion battery packs, battery chargers, docking stations, and highly efficient power supplies.

 **Mornsun** are a leading industrial power supply manufacturer headquartered in mainland China, providing complete power solutions.

 **MOSO** were established in 2006 and provide efficient and smart power solutions.

 **North Atlantic Industries** design and manufacture a wide variety of rugged and modified COTS and military power supplies, specifically designed for military, rugged environments.

 **Polyamp** specialise in DC/DC converters and power supplies. Their high-reliability products are used in systems with high demands.

 **Power LD** are a switching power supply manufacturer, providing a broad range of power supplies with more than 21 years' experience.

 **Premium** design and produce power conversion systems, principally custom products and solutions for markets which require high-quality, high-reliability and extremely resistant products.

 **Skynet** are an expert switch mode power supply manufacturer.

 **SL Power Electronics** have been an industry leader in externally and internally mounted power conversion solutions for over 30 years.

 **Yuasa** are world leaders in valve-regulated lead-acid-battery design and manufacture.

 **Zippy Technology Corporation** manufacture high-performance power supplies for computer network systems, communication systems, industrial equipment, medical devices, telecom/broadcast systems, and wind power applications.

Key technologies and suppliers

AC/DC power

DIN rail mounted

- 50W to 250W
- DC o/p volts from 3.3V to 48V
- Industrial

Enclosed OEM

- Medically approved
- 40W to 1600W
- Industrial / ITE

External

- 5W to 250W
- Wall mount and desk top
- Medically approved versions
- Erp Level V compliant

Modular

- 400W to 1.4KW
- Up to 12 separate outputs
- Wide range AC input
- Medically approved versions
- Card and chassis mounting

Open frame

- 5W to 350W
- Industrial and medical versions
- Universal AC input

PCB mounted

- 4.3W to 60W
- Universal AC input range
- Compact size

DC/AC (inverter)

DC/AC (inverter)

- Sine wave
- 180 to 300VA
- Open or enclosed
- DIN rail mount options

DC/DC power

DC/DC converters

- 1W to 600W
- Isolated and non isolated
- Wide range of input and output voltages

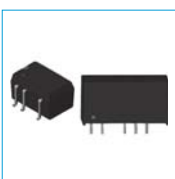

Enclosed

- 30W to 2000W power
- 24V to 154V input
- 5V to 110V output

Open frame

- 40W to 110W power
- 10V to 90V input
- Up to 4 outputs

PCB mounted

- Variety of input ranges
- Output ranges from 1W to 700W
- Different package sizes

Specialist power

Batteries

- Sealed lead acid
- Standby
- Heavy duty

Battery chargers

- Lithium-ion, lead acid, NiMH, NiCd
- External
- Universal AC input

Custom power supplies

- Range of value add designs
- Modified standard products
- Custom design products

LED lighting power

- Constant current
- Constant voltage
- Dimming

Power over Ethernet

- 15W to 80W
- IEEE 802.3 compliant
- 10/100 BASE T
- 10/100/1000 BASE T

VME

- 75W to 600W
- Rugged
- Open frame
- Pluggable
